Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

 Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants explained their opinion regarding the rejection under section 103, which could be summarized as a). None of the references relied on, particularly the Dwarki reference, teaches combining the enhancer with an AAV ITR promoter; b). The general state of the art is that AAV LTR alone would be insufficient for achieving therapeutic effect. The Examiners pointed out that Dwarki reference does not exclude using AAV ITR promoter alone, and that using an enhancer along with a weak promoter to enhance the gene expression would be obvious for the ordinary skilled in the art. The Examiners also pointed out that only claims 91 and 92 require therapeutic levels of FVIII expression, and applicants haven't shown that the vector in the prior art could not do so as Zhang reference indicated that AAV LTR could be used as a gene therapy vector. Applicants pointed out that Zhang reference actually used another promoter, AAV p5. Applicants will submit response addressing the discussed issues. And the Examiners will review the prosecution history and consider the arguments.
